Post-Change Validation Report

Overall Status: WARN

FAIL: 0 WARN: 2 PASS: 10 INFO: 9

Area	Status	Summary
MAC Addresses	WARN	Access-port MACs checked: 40; present on expected port: 39; missing: 1; present on non-inferred port: 0.
PoE Delivery	PASS	1 previously powered access port(s) still show PoE after change.
Neighbors	PASS + EVIDENCE	CDP: 2 matched; 1 advertisement cleared by MAC/PoE evidence. LLDP: 2 matched.
Interface Status	WARN	1 mapped port issue(s) require review.
Trunks	PASS	No pre-change trunk ports disappeared; 2 matched through the port map.
STP Root	PASS	2 STP VLAN(s) retained expected root/mapped root-port behavior.

Severity	Category	Finding	Detail
WARN	Access Port MAC Correlation	Access-port MACs checked: 40; present on expected port: 39; missing: 1; present on non-inferred port: 0.	`Structured detail table appears below.`
WARN	Interface Status	1 mapped port issue(s) require review.	`Structured detail table appears below.`
PASS	CDP Neighbors	2 cdp neighbor record(s) matched after change.	`Structured detail table appears below.`
PASS	Environment	Environment output found with no obvious fault/fail/alarm keywords.	`OK/normal/good lines detected: 3`
PASS	Interface Status	41 mapped connected port(s) remained connected after change.	`Structured detail table appears below.`
PASS	LLDP Neighbors	2 lldp neighbor record(s) matched after change.	`Structured detail table appears below.`
PASS	Logs	No high-risk log keywords found.	
PASS	MAC Table	MAC address count acceptable: 40 before, 39 after.	
PASS	PoE	1 previously powered access port(s) still show PoE after change.	`Structured detail table appears below.`
PASS	STP Root	2 STP VLAN(s) retained expected root/mapped root-port behavior.	`Structured detail table appears below.`

Severity	Category	Finding	Detail
PASS	Switch Detail	Post-change switch detail section is present and contains active/ready/standby wording.	
PASS	Trunks	No pre-change trunk ports disappeared; 2 matched through the port map.	`Gi1/0/25 -> Te1/1/1` `Gi2/0/52 -> Te2/1/8`
INFO	CDP Neighbors	1 cdp neighbor advertisement(s) missing, but endpoint evidence is present on the mapped port.	`Structured detail table appears below.`
INFO	CPU	CPU five-second utilization: 4%	`High CPU during immediate post-change may be transient; review only if sustained or paired with symptoms.`
INFO	Command Sections	Post-change sections found: 16	`show cdp neighbors, show environment all, show interfaces status, show interfaces transceiver detail, show interfaces trunk, show inventory, show lldp neighbors, show logging, show mac address-table, show power inline, show processes cpu, show running-config, show spanning-tree root, show spanning-tree summary, show switch detail, show version`
INFO	Command Sections	Pre-change sections found: 16	`show cdp neighbors, show environment all, show interfaces status, show interfaces transceiver detail, show interfaces trunk, show inventory, show lldp neighbors, show logging, show mac address-table, show power inline, show processes cpu, show running-config, show spanning-tree root, show spanning-tree summary, show switch detail, show version`
INFO	Interface Status	4 mapped port(s) remained not connected/disabled.	`Suppressed detailed unchanged-down rows.`
INFO	Inventory	Inventory parsed: 2 PID/model value(s), 2 serial value(s).	`Structured detail table appears below.`
INFO	Port Map	Port map loaded with 152 old-to-new mapping row(s).	`Structured detail table appears below.`
INFO	Transceiver	2 transceiver detail block(s) captured for review.	`Structured detail table appears below.`

INFO	Version	Version section captured for documentation.	`Cisco IOS XE Software, Version 17.09.04`
			`Cisco IOS Software [Cupertino], Catalyst L3 Switch Software (CAT9K_IOSXE), Version 17.9.4, RELEASE SOFTWARE (fc5)`
			`System image file is "bootflash:packages.conf"`
			`FICSITE01-ACC-SW01 uptime is 2 hours, 15 minutes`

Port Map Detail

Port map loaded with 152 old-to-new mapping row(s).

Section	Item	Value / Target	Note
Source	Source	Auto-detected from post-change running-config	
Summary	Profile	environment standard refresh mapping	
Summary	Detected stack members	1, 2	

Section	Item	Value / Target	Note
Summary	Detected stack size	2	
Summary	Standard uplink A target	Te1/1/1	
Summary	Standard uplink B target	Te2/1/8	
Summary	switch 1	model=c9300-48u, access_prefix=Gi (interface scan)	
Summary	switch 2	model=c9300-24ux, access_prefix=Te (model)	
Inferred 24-port trunk uplink mapping(s)	Gi1/0/25	Te1/1/1	

PoE Detail

1 previously powered access port(s) still show PoE after change.

PoE Budget (gray = pre-change, black = post-change)

Post-change used 12.60 W / 370.00 W (3.4%); remaining 357.40 W; delta +0.00 W

Pre Port	Post Port	Status	Pre Evidence	Post Evidence
Gi1/0/15	Gi1/0/15	PoE still delivering	Gi1/0/15 auto on 6.3 IP Phone 7960 3 30.0	Gi1/0/15 auto on 6.1 IP Phone 7960 3 30.0

CDP Neighbors Detail

2 cdp neighbor record(s) matched after change.

Status	Neighbor	Pre Local	Post Local	Remote	Evidence
Matched mapped	gw-a.core.example	Gi1/0/25	Te1/1/1	Twe1/0/22	
Matched mapped	gw-b.core.example	Gi2/0/52	Te2/1/8	Twe1/0/23	

LLDP Neighbors Detail

2 lldp neighbor record(s) matched after change.

Status	Neighbor	Pre Local	Post Local	Remote	Evidence
Matched mapped	unknown	Gi1/0/25	Te1/1/1	Twe1/0/22	
Matched mapped	unknown	Gi2/0/52	Te2/1/8	Twe1/0/23	

CDP Neighbors Detail

1 cdp neighbor advertisement(s) missing, but endpoint evidence is present on the mapped port.

Status	Neighbor	Pre Local	Post Local	Remote	Evidence
Missing advertisement	phone-ficsite01.example	Gi1/0/15	Gi1/0/15	Gi0/1	1 expected MAC(s) present on mapped post port; PoE still delivering on mapped post port; mapped post port is connected

Interface Status Detail

1 mapped port issue(s) require review.

Pre	Post	Role	Status	Pre Evidence	Post Evidence	Note
Gi1/0/18	Gi1/0/18	access	was connected before, now notconnect	Gi1/0/18 spare-workstation connected 100 a-full a-1000 10/100/1000BaseTX	Gi1/0/18 spare-workstation notconnect 100 auto auto 10/100/1000BaseTX	Auto-detected access mapping (c9300-48u)

Interface Status Detail

41 mapped connected port(s) remained connected after change.
